

Major Land Resource Area 074X

Central Kansas Sandstone Hills

Accessed: 05/11/2025

Ecological site keys

MLRA 74

I. Alluvial Soils (floodplains, terraces, and interdunes)

- A. Soils that have a seasonal or perennial high water table (<6 feet from surface)
 - i. Soils with a water table <6 feet ... HX074XY132KS - Subirrigated
- B. Soils that do not have a seasonal or perennial high-water table (>6 feet from surface)
 - i. Soils with high concentration of salts EC > 4 ds/m in the profile ... HX074XY120KS - Saline Lowland
 - ii. Soils with >52% sand in the surface ... HX074XY123KS - Sandy Floodplain
 - iii. Surface texture is >40% clay within 12" ... HX074XY104KS - Clay Lowland
 - iv. Site occurs on stream terraces ... HX074XY114KS - Loamy Terrace
 - v. All other soils with a water table >6 feet ... HX074XY113KS - Loamy Floodplain

II. Eolian Sandy Soils (generally soils with >52% sand)

- A. Soils with >52% sand in the surface ... HX074XY122KS - Sand Plains

III. Hills (undulating to hilly uplands)

- A. Soil depth <20 inches to sandstone ... HX074XY130KS - Shallow Sandstone
- B. Soils on uplands with clay content >45% at depths <14 inches ... HX074XY107KS - Clay Hills
- C. All other ... HX074XY115KS - Loamy Hills
